

ULTRASprig

a Sprig on steroids

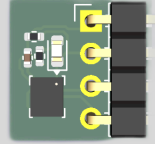

the **next-gen** Sprig

- 4 I2C Expansion slots
- PSRAM + Flash expansions
- Built-in SD Card Reader

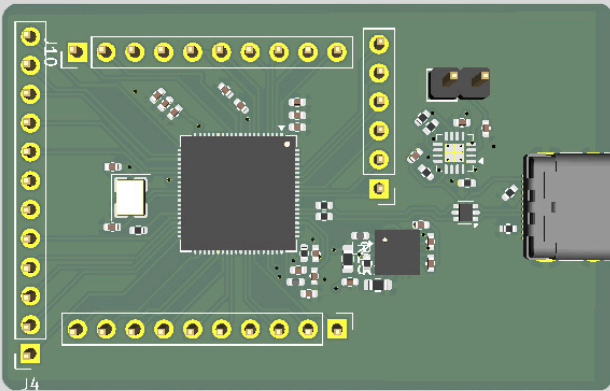

The expansion modules

- LSM6D (IMU)
- PC8575 (IO Expander)
- W25Q (16MB Ram)
- ... and more!

Pictured:
the IMU expansion

ULTRA-powerful!

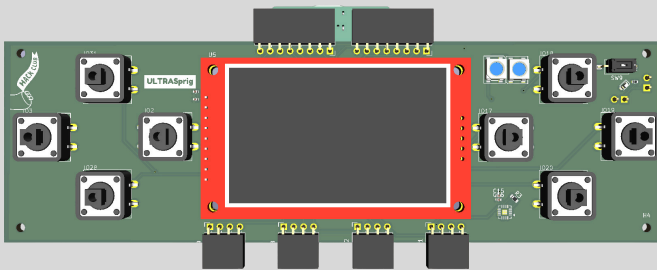

Coreboard

- RP2354B (QFN-80!)
- 2MB of Flash
- Battery Charging

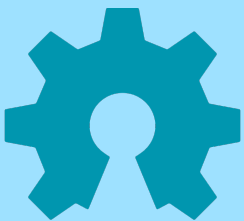

the “main” computing module
for the ULTRASprig (fully custom
and hot-swappable!)

ULTRA-modular!

Mainboard

- 7 GPIOs, 2 RGB LEDs
- 8 buttons
- Battery Charging
the Sprig part of the
ULTRASprig
